⚠ SMALL PARTS. Not for < 3yrs.

⚠ **WARNING:**
**CHOKING HAZARD**- Small parts. Not for children under 3 yrs.

## For more than a century,

**consumers have felt good about using our products because they trust the Crayola brand to deliver superior quality children's art materials that are safe and nontoxic.**

In 1936 Binney & Smith became a founding member of the Crayon, Watercolor, and Craft Institute, now the Art and Creative Material Institute. (ACMI), promoting product safety in art materials for children. We were also one of the first companies to list toxicity information on paint labels and to identify colors chemically, as well as by international color standards. We adhere to all governmental and industry safety standards and have our products reviewed by an independent toxicologist.

The AP (Approved Product) seal of the ACMI that you'll find on Crayola products means they are nontoxic even if ingested and are independently certified to contain no materials in sufficient quantities to be harmful to humans, or to cause acute or chronic health problems. Our formulas also undergo extensive toxicological examination, and our procedures are reviewed by the ACMI's toxicology advisory board to ensure that proper standards are maintained.

Our products are also certified by ACMI to be labeled in accordance with the chronic hazard labeling standards, ASTM D-4236, and the U.S. Labeling of Hazardous Art Materials Acts (LHAMA). As required by ASTM D-4236, the ACMI provides Poisindex with information on Crayola art products that may be obtained by consumers calling their local or regional poison control center.

Additionally, some products bearing the AP seal are certified to meet or exceed specific requirements or material, workmanship, working qualities, and color described in the appropriate product standard developed by the ACMI and other recognized standards organizations. The ACMI can be contacted for product requirements and compliance at (781) 293-4100.

**The safety of our products and our consumer trust is something we take very seriously, and we will continue to maintain that trust every day.**

Conforms to
ASTM D-4236
